

FREE Secondary Teaching for Mastery Introductory Lesson Design Twilight Sessions

Join our secondary colleagues for two afternoons of carefully crafted lesson design providing a step by step, conceptual journey of a single concept to be decided by the group.

The project will focus on collaboratively designing a lesson, making use of key resources such as the Secondary Mastery Professional Development materials, a range of text books and teacher knowledge. There has been a large investment in available resources and making effective use of them will support schools in embedding teaching for mastery in mathematics. It will be an opportunity for teachers to reflect on how these materials can be best used to support the planning process to develop subject and pedagogical knowledge.

Who?

Schools that have joined the mastery advocate programme and made a commitment to teaching for mastery in their curriculum planning as well as schools who have expressed an interest in joining the Mastery Advocate Programme in September 2020. Participants attend both twilight sessions with the other schools in the work group.

| When? | Where |
|---|---|
| Day 1: Thursday 29th April 2020 (14.00 - 16.30) Day 2: Wednesday 1st July 2020 (14.00 - 16.30) Participants must attend both sessions with the other schools in the Work Group. | Southfields Academy, 333 Merton Rd, London, SW18 5JU |

Outcomes

Participants should gain a deep understanding of the elements of effective lesson design and how the big ideas of mastery influence this, particularly regarding small steps of learning. Collaboratively, they will be given the opportunity to make decisions about why to include or leave out certain questions, and when to supplement the materials with their own. Teachers are expected to share their learning with their department and this will impact on the maths learning across the department; developing confident mathematicians in their classrooms.

Expectations

Participants will be expected to attend all workshops. Colleagues from a school will work collaboratively to design, reflect and evaluate lessons. Participants will be expected to offer their feedback on the Mastery Professional Development Materials as well as the lessons that they collaboratively design.

You will also find out more about the many funded Teaching for Mastery and professional development opportunities available.

We are limited to 15 places on this twilight session so please book early to avoid disappointment.

For more information, or to book a place, please contact the London SW Maths Hub Administrator by email admin@londonsouthwestmathshub.co.uk
